CONTENTS VOLUME 116, NOS. 1&2, 1992

LIPID METABOLISM IN THE HEALTY AND DISEASED HEART

Preface 1

N.S. Dhalla, V. Elimban and H. Rupp: Paradoxical role of lipid metabolism in heart function and dysfunction 3
G.J. van der Vusse and M.J.M. de Groot: Interrelationship between lactate and cardiac fatty acid metabolism 11
J.S. Charnock, P.L. McLennan and M.Y. Abeywardena: Dietary modulation of lipid metabolism and mechanical performance of the heart 19
J.T.A. Meij and V. Panagia: The substrate specificity of phosphoinositide-phospholipase C in rat heart sarcolemma 27
B. Rodrigues, M.R. Spooner and D.L. Severson: Long term incubation of cardiac myocytes with oleic acid and very-low density lipoprotein reduces heparin-releasable lipoprotein lipase activity 33
G.A. Cook and M.D. Lappi: Carnitine palmitoyltransferase in the heart is controlled by a different mechanism than the hepatic enzyme 39
T.K. Steigen, T. Myrmel, K. Forsdahl and T.S. Larsen: Myocardial cell vulnerability to exogenous phospholipase attack 47
P.C. Choy, M. Chan, G. Hatch and R.Y.K. Man: Phosphatidylcholine metabolism in ischemic and hypoxic hearts 53
J.M.J. Lamers, D.H.W. Dekkers, K. Bezstarosti, J.T.A. Meij and H.A.A. van Heugten: Occurrence and functions of the phosphatidylinositol cycle in the myocardium 59
C.R. McMaster, P.G. Tardi and P.C. Choy: Modulation of phosphatidylethanolamine biosynthesis by exogenous ethanolamine and analogues in the hamster heart 69
A. Grynberg, G. Nalbone, J. Leonardi, H. Lafont and P. Athias: Eicosapentaenoic and docosahexaenoic acids in cultured rat ventricular myocytes and hypoxia-induced alterations of phospholipase-A activity 75
G.W. Sloof, F.C. Visser, T. Teerlink, E.F.I. Comans, M.J. van Eenige, G.J. van der Vusse and F.F. Knapp Jr.: Incorporation of radioiodinated fatty acids into cardiac phospholipids of normoxic canine myocardium 79
A. Vecchini, L. Binaglia, P. Di Nardo, M. Bartoli, M. Minieri and G. Tallarida: Kinetic changes of ethanolamine base exchange activity and increase of viscosity in sarcolemmal membranes of hamster heart during development of cardiomyopathy 89
M. van Bilsen, C.P.M. Reutelingsperger, P.H.M. Willemsen, R.S. Reneman and G.J. van der Vusse: Annexins in cardiac tissue: cellular localization and effect on phospholipase activity 95
R. Lerch, C. Tamm, I. Papageorgiou and R.H. Benzi: Myocardial fatty acid oxidation during ischemia and reperfusion 103
G.D. Lopaschuk and M. Saddik: The relative contribution of glucose and fatty acids to ATP production in hearts reperfused following ischemia 111
D. Siliprandi, C. Biban, S. Testa, A. Toninello and N. Siliprandi: Effects of palmitoyl CoA and palmitoyl carnitine on the membrane potential and Mg^{2+} content of rat heart mitochondria 117
W.C. Hülsmann and M.L. Dubelaar: Carnitine requirement of vascular endothelial and smooth muscle cells in imminent ischemia 125
D.J. Paulson, A.L. Shug and J. Zhao: Protection of the ischemic diabetic heart by L-propionylcarnitine therapy 131
R. Motterlini, M. Samaja, M. Tarantola, R. Micheletti and G. Bianchi: Functional and metabolic effects of propionyl-L-carnitine in the isolated perfused hypertrophied rat heart 139
L.M.A. Sassen, D.J. Duncker, A. Hogendoorn, E.O. McFalls, R. Krams, K. Bezstarosti, J.M.J. Lamers and P.D. Verdouw: L- propionylcarnitine and myocardial performance in stunned porcine myocardium 147
A.H. Kleine, J.F.C. Glatz, F.A. van Nieuwenhoven and G.J. van der Vusse: Release of heart fatty acid-binding protein into plasma after acute myocardial infarction in man 155
V.W.M. van Hinsbergh: Regulatory functions of the coronary endothelium 163

K. Schoonderwoerd and H. Stam: Lipid metabolism of myocardial endothelial cells 171
R.O. Scow and E.J. Blanchette-Mackie: Endothelium, the dynamic interface in cardiac lipid transport 181
D. Di Pierro, B. Tavazzi, G. Lazzarino and B. Giardina: Malondialdehyde is a biochemical marker of peroxidative damage in the isolated reperfused rat heart 193
A. Pietersma, N. de Jong, W. Sluiter and J.F. Koster: Studies on the interaction of leucocytes and the myocardial vasculature. I. Effect of hypoxia on the adherence of blood granulocytes 197
M.C.J.G. Linssen, P.H.M. Willemsen, V.V.Th. Heijnen and G.J. van der Vusse: Arachidonic acid incorporation in cardiomyocytes, endothelial cells and fibroblast-like cells isolated from adult rat heart 203
